

LANDSCAPE CASE STUDY: NIRVANA SPA & LEISURE HOTEL, BERKSHIRE

Nirvana Spa and Leisure Hotel in Sindlesham, Berkshire, offers guests a relaxing and decadent experience.

The project comprised nearly 30 beds of internal and external planting schemes for a number of distinct zones of the complex, from mature Grecian palms to softer architectural pillars in the Colosseum thermal suite, to privacy hedging and native planting outside in the Roman pool and spa garden.

The planting was required to convey a feeling of established elegance and Mediterranean grandeur whilst being hardy to withstand the British climate.
